

## What I need to learn at home this Summer Term in Maths

### Y3 add and subtract 1, 10 and 100 from a three digit number

#### Speedy facts I need to learn

# +/- 1, 10, 100 from a 3 digit

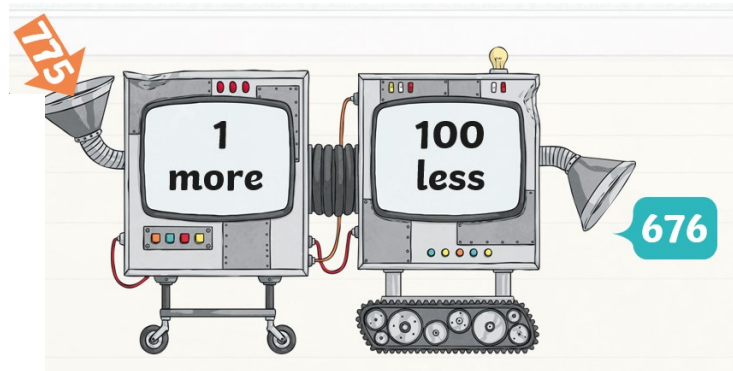

For example

$$123 - 1 \quad 123 + 1$$

$$123 - 10 \quad 123 + 10$$

$$123 - 100 \quad 123 + 100$$

Which digits change?

Times tables practise - you will need to recall your 2, 5, and 10 times table and start learning your 4 and 8 timetables—if you know your 4's then double the answer to know your 8's

You can time yourself or make up songs to help you. Or LOGIN to Times Tables Rockstars to practise!
